The Carnegie Research Commons is a high-level research environment intended for use by postgraduate students at masters and doctoral level.

Publication metrics can assist you in deciding which area of research to pursue and assist with deciding where to publish. Metrics include citation analysis, citation reports, and article metrics. Another aspect of Research Impact includes unique author identifiers such as ORCID.

Mendeley is a reference management tool that enables you to manage citations and PDFs using a desktop client. Training sessions are available throughout the year.

SUNScholar is an open access electronic archive for the collection, preservation and distribution of digital materials created by researchers of Stellenbosch University.

Generic training sessions are offered by the library throughout the year. Here, you will find the Library’s training calendar for all Generic training sessions.

Here you will find the Library’s Postgraduate Researcher Guide that highlights all the Library services offered to Postgraduate students.

A structured plan about the research data to be collected in your research project is essential: what type of data will the project generate, the format of the data and how, and where, to store the data.

Library Guides are available for all departments on Campus, to assist you in finding the information you need. Here you will also find your Faculty Librarian.

The library’s Quick Links provide fast access to our most popular and most used services such as the Referencing link to our Stellenbosch Harvard Guide, the training calendar and Interlibrary Loans.
