Use FIND *E-Journals* to locate specific e-journal titles/articles that SU subscribes to

The screenshot shows the 'Full Text Finder' search interface. On the left, a sidebar lists various library resources: Books & other items, Short Loans, Articles, E-Books, E-references, E-databases, and **E-journals** (which is circled in blue). The main content area is titled 'Publications' and features a search bar with the placeholder text 'Enter title, subject or ISSN/ISBN' and a green 'Search' button. Below the search bar, a 'Browse By Discipline' section lists various academic fields and their corresponding item counts. The disciplines are organized into three columns.

Browse By Discipline

Clinical Science

Variations in hospitals costs for surgical procedures: inefficient care or sick patients? Original Research Article Pages 1-9

Faiz Gani, John Hundt, Michael Daniel, Jonathan E. Efron, Martin A. Makary, Timothy M. Pawlik

Abstract | Close research highlights | PDF (1077 K)

Highlights

- Patients undergoing a major surgical procedure from 2009-2013 were identified.
- Multivariable regression identified factors associated with hospital costs.
- Over 86% of the variation in costs was due to differences in patient characteristics.
- 8% of the total variation in costs was attributed to surgeon practices.
- 6% of the total variation in costs was due to differences between surgical specialties.

The impact of major intraoperative adverse events on hospital readmissions Original Research Article Pages 10-17

Anirudh R. Nandan, Jordan D. Bohnen, David C. Chang, D. Dante Yeh, Jarone Lee, George C. Velmahos, Haytham M.A. Kaafarani

Abstract | Close research highlights | PDF (330 K)

Overview

The research process typically includes five broad steps. Most often you complete one step before moving onto the next. However, there may be times when you will need to return to a previous step or complete multiple steps simultaneously.

Step 1. Start out

[Understand your assignment](#) | [Identify keywords](#) | [Refine a topic](#) | [Controlled Vocabulary](#)

Step 2. Find information (learn how to locate and access information and data)

[Search strategies](#) | [Find books](#) | [Find articles](#) | [Find websites](#) | [Find other sources](#) | [Find full-text articles](#)

Step 3. Evaluate Information

[Evaluate sources](#) | [Primary v secondary sources](#) | [Types of periodicals](#)

Step 4. Use, organize and communicate information

[Notetaking](#) | [Paraphrasing](#)

Step 5. Use responsibly

[Plagiarism](#) | [Turnitin](#) | [Referencing](#) | [Reference managing tools](#) | [Copyright](#)

Training programmes and
Search Strategy

Search Strategy
 Find Books
 Locate and access Books
 Find Articles
 Find Websites
 Find other sources (grey literature and conference proceedings)
 Find full-text articles
 Find different media, formats and social media

In order to retrieve the most relevant information, you need to construct a **search string**. A search string is a combination of keywords and boolean operators you enter into a search engine or an Internet search engine.

Comments (0)

Search strategy guides
 Four basic types of search strategies

 1. Quick & easy

 2. Building blocks

 3. Successive fraction

 4. Pearl growing (snow-balling)

Consult the search strategy worksheet to learn more.

Search: This Guide

Search strategy builder

Use the "Search strategy builder" to help you create a search string, using Boolean logic. You can cut and paste the results into most databases' search boxes. If you cannot find items on your topic, contact your supervisor or faculty librarian.

Also see "Remedies for when you find too little or too much information".

Comments (0)

Boolean Operators

Boolean searching is the traditional way to search for information in most online databases and on the Internet. Boolean operators, or connector words, such as AND, OR, and NOT, are used to create phrases and concepts based on specific rules of search logic. Use the [Boolean machine](#) to help with your search string.

E-Databases for Medicine and Health Sciences

IMPORTANT: On-campus use of subscription e-resources with or without Inetkey

Although the Library's subscription e-resources are still available free of charge on-campus, opening the Inetkey will download their web pages faster. Due to many add-ons such as adverts, Google Analytics, etc. which come as a given with web pages nowadays and over which the Library has no control, the page will download slower with the Inetkey closed. Do note that on-campus, even with your Inetkey open, you won't be charged for the subscription e-resource's base URL, only for the add-ons to the web page.

Step-by-step guide

How do I do my assignment? To find, access and use information effectively, use the *[step-by-step guide.](#)*

The Library and Information Service offers a wide range of group training sessions with the main focus on enhancing the information literacy skills of all students at Stellenbosch University. A [framework](#) for Information Literacy was contemplated and accepted in 2014 to provide structure for an effective information literacy skills training program. The framework describes the development of different levels of information literacy competencies.

Borrowing privileges

Undergraduate students may borrow 6 items for 2 weeks and may renew each item twice, unless someone else has requested the item. See the page [Renew](#).

Items may be returned to the JS Gericke Library and any branch library of the Library and Information Service. See "Access".

Reserving of books is free of charge and unlimited. See [Reserve a book currently on loan](#).

Fines are charged for overdue books at 50c per item per day. The fine limit is R50-00. Borrowing privileges are suspended when this limit has been exceeded.

If an item has been lost or damaged, the replacement value will be payable to the Library and Information Service.

Short loans

Frequently used material may be borrowed for the following short periods to ensure that it is accessible to a large number of clients. The short loan collection consists mainly of recommended reading material which may include library books and other library material, photocopies of journal articles, chapters of books and privately owned books.

3 items for 3 hours
