IMPORTANT: On-campus use of subscription e-resources with or without Inetkey

Although the Library's subscription e-resources are still available free of charge on-campus, opening the Inetkey will download their web pages faster. Due to many add-ons such as adverts, Google Analytics, etc. which come as a given with web pages nowadays and over which the Library has no control, the page will download slower with the Inetkey closed. Do note that on-campus, even with your Inetkey open, you won't be charged for the subscription e-resource's base URL, only for the add-ons to the web page.

JSTOR

For impact factors

JSTOR offers a high-quality, interdisciplinary archive to support scholarship and teaching. It includes archives of over one thousand leading academic journals across the humanities, social sciences, and sciences, as well as select monographs and other materials valuable for academic work. The entire corpus is full-text searchable, offers search term highlighting, includes high-quality images, and is interlinked by millions of citations and references. The most recently published issues (past 3-5 years) are not available.

To find JSTOR click on the J for the list of databases and click on **JSTOR**

STUDENT PERCEPTION AS MODERATOR FOR STUDENT WELLBEING

(Accepted 28 August 2006)

ABSTRACT. Student motivation as well as student perception of interpersonal teacher behaviour are linked to the sense of wellbeing at student level. However, while most of the variance in the measurement of student wellbeing was situated at student level, eleven percent of variance was found at classroom level. In this article we focus on this variance at classroom level and the moderating role that student perception of interpersonal teacher behaviour has. From an interpersonal perspective on teaching, the relationship between teacher wellbeing, perceptions of interpersonal teacher behaviour, and student wellbeing is examined. Grade 9 students of technical and vocational training schools are participating in this study. In the analyses a distinction is made between teaching academic subjects and teaching vocational subjects. There appears to be a direct link between the wellbeing of the teachers of academic subjects and the wellbeing of their students. Students who perceive their academic teacher as leading, helpful and friendly score higher on wellbeing, while wellbeing decreases when an academic teacher is perceived as strict and admonishing. The relationship between the teacher of vocational subjects who typifies himself as strict and admonishing, and the wellbeing of his students, is moderated by student perceptions of teacher interpersonal behaviour. A direct relationship between the wellbeing of the vocational teacher and the wellbeing of students is not found. Only when the vocational teacher's wellbeing is high and student perceptions of uncertain or dissatisfied interpersonal teacher behaviour is low, does student wellbeing increase. We conclude that for vocational subjects, student perceptions of interpersonal teacher behaviour are crucial moderators. Finally, students who are highly motivated to learn practical subjects, have a higher score on student wellbeing. By contrast, the fact that education is inherently obligatory has a negative influence on student wellbeing.

KEY WORDS: classroom climate, interpersonal teacher behaviour, student perceptions, student wellbeing, teacher perceptions, teacher wellbeing
