[Mendeley](#) is a reference management tool that enables you to manage citations and PDFs using a [desktop client](#) or through your account on Mendeley web. Mendeley also includes plug-ins for Word or OpenOffice, so you can easily create citations and/or bibliographies as you write. It also allows you to organise your research, collaborate with others online, and discover the latest research.

Unfortunately the Mendeley Pilot project @ Stellenbosch came to an end in December 2014. Clients who made use of the offer to upgrade to Mendeley Premium will continue to have access to it for as long as they are part of Stellenbosch University.
